I chose the Gap because nature is important and is more valuable than what it seems to be. So I chose the word 'nature' and I chose 'nature' plus my camera skills of course. I included the tree gathering pollen from the plant to show a form of why of what the species does for the earth. I hope that my photo will reach people's eyes and see the real pandemic. Without being aware of the trees and plants would not be knowing the way they are if I didn't exist.
