Understanding your energy choices.

You can make a comparison between Clean Power Alliance and Southern California Edison rates and see the energy mix of each to decide which service provider and rate works for you. The charts below illustrate the estimated electricity costs for a representative residential CARE customer with an average monthly energy use of 520 kilowatt hours (kWh). This comparison is based on Clean Power Alliance rates approved by its Board of Directors at a duly-noticed public meeting and effective as of July 1, 2024. Southern California Edison rate options are based on rates effective June 1, 2024. Both CPA and SCE rates are subject to change.

Average Monthly Bill (\$)	\$125.80	\$123.94	\$125.80	\$135.11

Generation Rate reflects the cost of producing or purchasing electricity to power your residence. This rate will vary depending on your service provider and rate plan.

SCE Delivery Rate is a charge assessed by SCE to deliver electricity to your residence. This rate is the same regardless of service provider.

Surcharges represent the Cost Responsibility Surcharge (CRS) and Franchise Fee (FF) that are applicable to Community Choice Aggregation (CCA) customers. The CRS is a surcharge to recover costs associated with power purchases made on behalf of customers, prior to a customer's switch to a CCA, or to an SCE Green Rate. The FF recovers taxes owed to a city in exchange for allowing SCE to utilize electrical distribution lines throughout the property of the city. SCE acts as the collection agency for the FF surcharge which is levied by cities and counties for all customers.
